2024 Trauma Conference

September 20, 2024

This conference is a one-day educational opportunity to provide current issues and trends related to the trauma patient.

Objectives

1. Resuscitate before you Intubate: Learn how to prevent peri-intubation cardiac arrest in the critically ill trauma patient.
2. No Indecision before the Incision: Learn how to develop the proper mental model needed to prevent hesitation in performing a surgical cricothyrotomy.
3. Rapid Recognition and Management of Pediatric Trauma.
4. Optimizing Outcomes through Specialized Procedures and Transfer Priorities.
5. Explain why the geriatric population is at risk for trauma.
6. Correlate the mechanism of injury with the physiological considerations for the geriatric trauma patient.
7. Describe the anatomical and physiological alterations of pregnancy and their impact on trauma care.
8. Outline the treatment priorities and assessment methods for pregnant trauma patients.
9. Stabilize and begin treatment for a child with a burn.
10. List critical steps in the care of a child with a burn.
11. To understand the basics of pediatric head trauma.
12. To learn what is life-saving brain surgery.
